

"EASY-SET" MOLE ELIMINATOR

US PATENT NO. 4765087

FULLY ASSEMBLED

READY TO USE

**NO POISONS
OR HAZARDOUS CHEMICALS**

BUILT IN SAFETY FEATURES

An amazing patented product eliminates pesky moles from lawns and gardens—proven performance on lawns, gardens and golf courses all over the U.S.

The "EASY-SET" MOLE ELIMINATOR is the most effective mole control device available. It is easy to use and is designed for safe operation where tunneling moles create havoc. No more silly ineffective methods such as running a hose into the tunnel and turning a lawn into a rice paddy; or gassing them with fumes from your automobile exhaust pipe.

Consumers love the "MOLE ELIMINATOR" which utilizes a simple foot-stepping motion to safely set underground across a mole tunnel. When a mole returns through a burrowed tunnel it raises the trigger device and the spring-loaded jaws snap shut, ensuring a quick and humane kill. No bait is used and there are no holes to dig.

The "EASY-SET" MOLE ELIMINATOR is constructed of electroplated high-strength steel for rugged use and long life. It is guaranteed against defects in material and workmanship. (See Manufacturer's Limited Warranty). Each "MOLE ELIMINATOR" is individually boxed and includes complete operating instructions.

Customers continue to declare, **"IT WORKS!"**
